

## English version

Welcome to **Streamco Smartswitch**!

**Streamco Smartswitch** as stands from its name is a smart and flexible system designed to build whatever-you-want telephony/messaging processor.

As you may see, it's a very powerful and flexible system.

Majority of its features are available only in very expensive proprietary systems.

It allows you to use it as:

- Softswitch
- SOHO/Enterprise PBX
- Calling cards access server
- Telephony billing system
- Traffic analyser and service controller
- Anything you can imagine when it relates to telephony/messaging processing.
