

## H323 protocol

### Supported protocols

- H.323 v4
- H.225
- H.245
- T.38
- RAS
- support for "Fast start" procedure
- H.245 tunneling.  
Additional modes of tunneling:
  - cisco
  - QSIG

### Additionally

- support for devices under NAT;
- manipulation of ToS of frames;
- RTP bridging modes:
  - proxy
  - translation
  - passing through jitter buffer

### Implementations

There are 2 different stacks on choice:

- OpenH323;
- Objective Systems;

Both stacks could be used simultaneously and independently (to solve compatibility issue with attached equipment).
